

CURE Leukaemia

**HELP US FIND A CURE
FOR BLOOD CANCER**

ABOUT CURE LEUKAEMIA

With a new blood cancer diagnosis **every 27 seconds** worldwide, Cure Leukaemia funds research nurses and clinical roles at blood cancer centres across the UK, providing patients – both adults and children – with access to innovative and potentially life-saving treatments through clinical trials.

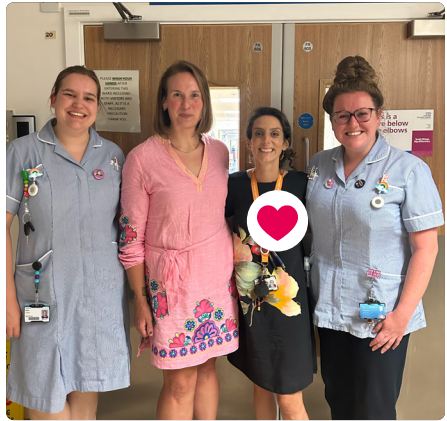

We want to make sure patients across the world have **the best** options and access to the medicine, treatment and care they **need**. We will stop at nothing as we innovate and create access to potentially lifesaving trials, and we channel that research to transform the lives of as many people as we can.

As a charity our focus is to push harder to increase funds so we can speed up progress and drive innovation. We're here to shape a better future for anyone with blood cancer.

We are making **significant progress** toward a cure. We are certain of that. With the world behind us, we can accelerate progress even more.

HOW WE SUPPORT PATIENTS

Patients are at the heart of everything we do at Cure Leukaemia. By funding Research Nurses and leading clinical trial networks across the UK, we help patients access cutting-edge treatments that might otherwise be out of reach. These trials offer potentially life-saving therapies while bringing hope, choice, and support to families facing blood cancer.

Our work helps move **pioneering research** from the lab to the bedside faster, connecting patients with expert clinicians and innovative treatments that are transforming outcomes and bringing us closer to a cure.

OFFERING HOPE FOR CHILDREN

The **ATICUS Network** will be the world's first national clinical trial infrastructure dedicated to paediatric stem cell transplants. It brings together all 11 UK paediatric transplant centres, including Royal Manchester Children's Hospital, Great Ormond Street Hospital, The Royal Hospital for Children in Glasgow, and Birmingham Children's Hospital.

Without ATICUS, there is currently no coordinated way for children to join these vital studies. The network will help close the gap in childhood blood cancer research and ensure more children can benefit from tomorrow's treatments today.

"Most kids are cured, but most is not enough."

PROFESSOR ROB WYNN
Royal Manchester Children's Hospital

We support Cure Leukaemia because we need more trials, we need to get the trials that are available for adults available for children.

JO HAWKRIDGE
Jude's Mum

I am delighted that Cure Leukaemia is one of our official charity partners for 2026.

Through Tour de 4 supporting Cure Leukaemia and their world first ATICUS Network, the funds raised will help children battling blood cancer.

PARTNER WITH US

At Cure Leukaemia, we believe that when businesses and communities come together, extraordinary change is possible.

By partnering with us, your organisation can **play a vital role** in the global fight against blood cancer, helping to accelerate life-saving treatments, support patients and their families, and fund pioneering research that gives hope to people everywhere.

WHY PARTNER WITH CURE LEUKAEMIA

LIFE SAVING IMPACT

As a corporate partner of Cure Leukaemia, you help fund cutting-edge trials that deliver faster blood cancer treatments and save lives.

POWERFUL CSR AND ESG ALIGNMENT

Supporting Cure Leukaemia shows your commitment to health and social responsibility, strengthening CSR and ESG while empowering employees to raise awareness and funds.

ENGAGING OPPORTUNITIES FOR EMPLOYEES AND CLIENTS

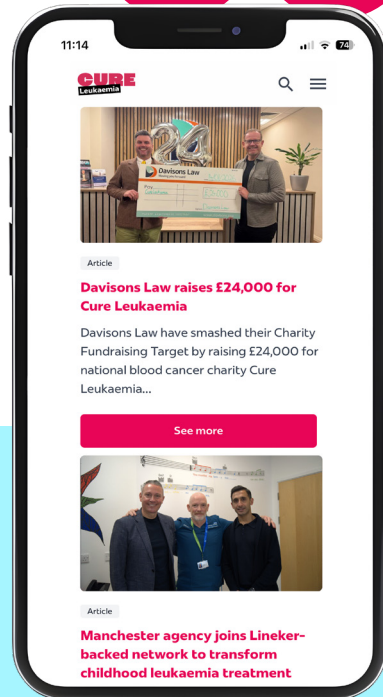

You can ride the Tour de France or Tour de France Femmes routes, Run For A Cure, or walk Hadrian's Wall—boosting morale, teamwork, and client engagement.

This partnership brings together two things that matter deeply to our people. The power of sport to bring communities together and the belief that everyone deserves access to better health outcomes.

KERRY McNALLY

Group Head of Communities and Engagement, Flutter Entertainment

POSITIVE PR AND STORYTELLING

Go beyond funding by sharing powerful patient stories from charity-backed clinical trials across your marketing, PR and internal communications.

BRAND ASSOCIATION WITH EXCELLENCE AND INNOVATION

You'll align with innovation, expertise and credibility in medical research enhancing your businesses brand trust and reputation.
